02/2013 - 11/2018

Bachelor of Computer Science - CEFET, Rio de Janeiro, Brazil.

01/2010 - 01/2013

High School - Federal Institute of Rio de Janeiro, Brazil .

Practical Experience

05/2023 - Now

Senior Front-End Developer, Joyn NV, Belgium (Remote)

- Responsible for maintaining and implementing new features for Joyn's main product, a platform built with React focusing on local loyalty and growth.
- Maintain and update the Joyn website.
- Enhance search engine optimization and improve website speed and loading times.
- Maintain Google Analytics and tagging.
- Create and maintain landing pages.

10/2022 - 04/2023

Sr. Software Engineer, Jochen Schweizer (ProSieben Group), Munich, Germany

- Maintain and develop new features for the high-traffic e-commerce platform and internal libraries.
- Create new components for the company's internal library, adhering to the in-house design system.
- Utilize Storybook for documenting components, tokens, spacing, and other design system elements.
- Onboard, mentor, and influence less experienced developers, sharing knowledge and skills.

11/2021 - 10/2022

Sr. Software Engineer, Stylight (ProSieben Group), Munich, Germany

- Maintained company's main page and developed new features for mobile and desktop.
- Ensured adherence to SEO best practices and pixel-perfect design concepts.
- Conducted regular A-B tests with design team to optimize user experience.
- Collaborated with back-end team to develop new API endpoints for efficient data delivery.
- Won company-wide "Open Friday" contest with a project improving product accessibility.

12/2020 - 11/2021

Front-end Developer, IBM CIO, Rio de Janeiro, Brazil

- Led Front-end development for a project modernizing a 30-year-old mainframe software into a cloud-based application.
- The project was chosen as an innovation with an impact and I presented it at IBM's global Demo Day event.
- Mentored colleagues for professional development.
- Collaborated with back-end team to develop new API endpoints for efficient data delivery.
- Acted as a Full-stack developer in cross-projects.

12/2018 - 12/2020

Full-Stack Developer, Infoglobo, Rio de Janeiro, Brazil

- Managed new features and maintenance for the entire client purchase flow, including product showcase, web shopping experience, and marketing strategy implementations.
- Developed a Content Management System (CMS) for creating, editing, and integrating product showcases.
- Actively participated in decision making, knowledge sharing, and system architecture studies.
- Collaborated with back-end team to develop new API endpoints for efficient data delivery.

06/2017- 12/2018

Web development intern, IBM, Rio de Janeiro, Brazil

- Developed web applications, including report, invoices, and contract generators for IBM Global Financing (IGF) teams in Canada and Atlanta.
- Conducted requirements gathering and delivered solutions within requested timeframes.
- Engaged in promoting and organizing internal and external tech community events.

02/2017- 06/2017

Web development intern, Infoglobo, Rio de Janeiro, Brazil

- Developed new features, improvements, and provided maintenance for O Globo and Extra websites.
- Proactively developed a spreadsheet for calculating sprint velocity and other metrics, which was adopted by other teams and is still in use.

03/2016 - 07/2016

Web development intern, Infoglobo, Rio de Janeiro, Brazil

- Worked primarily in German to test and validate an internal control and management software.
- Managed, set up, and updated data sheets for managers.
- Developed a solution for managing lunch orders for employees and customers, improving internal processes and efficiency. This solution is still in use (2023).
