Scholarships

09/2015 - 03/2016

I lived in Germany for a year as a student of DAAD and CAPES, part of a Brazilian government program called "Science without borders", where I learned German, studied computer science at Ulm Universität, and even worked at a large German technology company

Education

02/2019 - 12/2020

Bachelor of Information System - Universidade Estácio de Sá, Rio de Janeiro, Brazil.

09/2015 - 03/2016

Computer Science (Exchange Semester) - Universität Ulm, Ulm, Germany.

02/2013 - 11/2018

Bachelor of Computer Science - CEFET, Rio de Janeiro, Brazil.

01/2010 - 01/2013

High School - Federal Institute of Rio de Janeiro, Brazil .

Practical Experience

10/2022 - Now

Jochen Schweizer (ProSieben Group), Munich, Germany

"Sr. Software Engineer"

- Responsible for maintaining multiple Front-end fragments, onboarding new and less experienced devs, and developing new features for the company's main product, the e-commerce of experiences, with millions of access daily.

11/2021 - 10/2022

Stylight (ProSieben Group), Munich, Germany

"Software Engineer"

- Responsible for maintaining the company's main page and delivering new mobile and desktop features, always following pixel-perfect concepts and SEO best practices, and running A-B tests constantly with the design team, achieving the best user experience for the millions of users daily.
- Collaborated with the back-end team to develop new API endpoints in the BFF (Back for Front) to efficiently deliver data to the front-end.
- In the first week, I won an internal contest called "Open Friday", where I could share ideas for the company's improvement. In my project, I did refactor our main product, improving its accessibility for disabled people and creating awareness of this vital topic inside the company.

12/2020 - 11/2021

IBM CIO, Rio de Janeiro, Brazil

"Front-End Developer"

- I acted as the main Front-End developer, responsible for bringing mobile-first, pixel-perfect, and JS culture to the company.
- Responsible for the entire Front-End of an internal project that aims to transform a mainframe software with over 30 years of existence into a new web application, with
- In the first week, I won an internal contest called "Open Friday", where I could share ideas for the company's improvement. In my project, I did refactor our main product, improving its accessibility for disabled people and creating awareness of this vital topic inside the company.

Hobbies

GAMMING • TRAVELLING • SOCCER

12/2018 - 12/2020

Infoglobo, Rio de Janeiro, Brazil

Infoglobo is a company belonging to Globo group founded in 1925. Currently, it operates in the publication of the main newspapers and magazines of the brand and their respective websites, and at the moment it is the second-largest newspaper company in Brazil.

"Full-Stack Developer"

- Responsible for new features and maintenance for all the client purchase flow, as the product's showcase, user web shopping experience, and implementations of some marketing strategies.
- Responsible for the development of the management system (CMS), which was built to create, edit, and integrate all the product's showcases into one single content.
- I interact a lot in decision making, I help the whole team sharing knowledge and I have great participation in the studies and systems architectures.

06/2017 - 12/2018

IBM, Rio de Janeiro, Brazil

"Web Development Intern"

- Focused on developing applications for IBM Global Financing (IGF) teams from Canada and Atlanta, like financial reports and contract generators. Mostly they were both back and front end web applications.
- I interacted a lot with clients doing the requirements gathering and developing the best solutions in the time range requested.
- I engaged myself in the fomentation and creation of internal and external events focused on the technological community.

02/2017 - 06/2017

Infoglobo, Rio de Janeiro, Brazil

"Web Development Intern"

- Responsible for the development of new features, improvements, and maintenance mainly of the O Globo (<https://oglobo.globo.com/>) and Extra (<https://extra.globo.com/>) websites.
- Responsible for the development proactive of a spreadsheet used to calculate the sprint velocity and some other metrics. This spreadsheet was adopted for the other teams and still in use nowadays.

03/2016 - 07/2016

Bosch, Boxberg, Germany

During my exchange period in Germany, I had the opportunity to start my IT career at this technology giant.

"IT Intern"

- I worked using mainly the German language
- I was responsible for testing and validating the implementation of an internal control and management software
- I've also managed, setup and updated data sheets for my managers
- I developed, as my initiative, a solution for managing lunch orders for employees and customers, which generated an internal optimization and facilitated the whole food order process. It was so well accepted by everyone that still in use in the company until today (2022)
